

# USKids Collector API

This document describes the API endpoints for collecting US Kids tournament round data for an individual player in the TUGR Collector.

## Base URLs

- Development: <https://api.tugr.org/collector/develop/uskids>
- Production: <https://api.tugr.org/collector/production/uskids>

## HTTP Method

POST

## Request Headers

Header	Value	Description
Authorization	Bearer <token> (required)	A bearer token obtained from the authentication process
Content-Type	application/json (required)	Must be application/json

## Request Body Parameters

Name	Type	Required	Description
player_name	string	yes	Full name of the player
player_city	string	yes	Player's city
player_state	string	yes	Player's state (e.g., "FL")
player_country	string	yes	Player's country (e.g., "USA")
player_grad_year	string	yes	Graduation year (YYYY)
tournament_name	string	yes	Tournament name
tour	string	yes	Tour name
age_category	string	yes	Age category (e.g., "Boys 12-13")
round_date	string	yes	Round date (YYYY-MM-DD)
location_city	string	yes	Tournament location city
location_state	string	yes	State where the Tournament was played: CA, CO, UT, etc
course	string	yes	Golf course name
link	string	no	Tournament URL
round	integer	yes	Round number i.e. 1
